

Material group	5810	Page 1 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019
Safety data sheet according to EU Reg. 1907/2006 as amended		Supersedes July 2017

SAFETY DATA SHEET

FLUAZINAM 500 g/l SC

Revision: Sections containing a revision or new information are marked with a ♣.

♣ SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

- 1.1. **Product identifier** **FLUAZINAM 500 g/l SC**
Contains fluazinam and 1,2-benzisothiazol-3(2H)-one
- 1.2. **Relevant identified uses of the substance or mixture and uses advised against** Can be used as fungicide only.
- 1.3. **Details of the supplier of the safety data sheet** **CHEMINOVA A/S**, a subsidiary of FMC Corporation
 Thyborønvej 78
 DK-7673 Harboøre
 Denmark
SDS.Ronland@fmc.com
- 1.4. **Emergency telephone number**
Company +45 97 83 53 53 (24 h; for emergencies only)
- Medical emergencies:
- | | |

Material group	5810	Page 2 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

SECTION 2: HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture	Sensitisation – skin: Category 1B (H317) Toxic to reproduction: Category 2 (H361d) Hazards to the aquatic environment, acute: Category 1 (H400) chronic: Category 1 (H410)
WHO classification	Class U (Unlikely to present acute hazard in normal use)
Health hazards	Fluazinam can cause allergic sensitisation and is suspected of causing birth defects.
Environmental hazards	The product is very toxic to aquatic organisms.
2.2. Label elements	
<i>According to EU Reg. 1272/2008 as amended</i>	
Product identifier	Fluazinam 500 g/l SC Contains fluazinam and 1,2-benzisothiazol-3(2H)-one
Hazard pictograms (GHS07, GHS08, GHS09)	  
Signal word	Warning
Hazard statements	
H317	May cause an allergic skin reaction.
H361d	Suspected of damaging the unborn child.
H410	Very toxic to aquatic life with long lasting effects.
Supplementary hazard statement	
EUH401	To avoid risks to human health and the environment, comply with the instructions of use.
Precautionary statements	
P261	Avoid breathing vapours.
P280	Wear protective gloves, protective clothing and eye/face protection.
P302+P352	IF ON SKIN: Wash with plenty of soap and water.
P308+P313	IF exposed or concerned: Get medical attention/advice.
P362+P364	Take off contaminated clothing and wash it before reuse.
P501	Dispose of contents/container as hazardous waste.
2.3. Other hazards	None of the ingredients in the product meets the criteria for being PBT or vPvB.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substances	The product is a mixture, not a substance.
------------------------------	--

Material group	5810	Page 3 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

3.2. **Mixtures** See section 16 for full text of hazard statements.

Active ingredient

Fluazinam Content: 38% by weight
 CAS name/EU name 2-Pyridinamine, 3-chloro-N-[3-chloro-2,6-dinitro-4-(trifluoromethyl)-phenyl]-5-(trifluoromethyl)-
 CAS no. 79622-59-6
 IUPAC name 3-Chloro-N-(3-chloro-5-trifluoromethyl-2-pyridyl)- α,α,α -trifluoro-2,6-dinitro-p-toluidine
 ISO name Fluazinam
 EC no. (EINECS no.) None
 EU index no. 612-287-00-5
 Classification of the ingredient Acute toxicity, inhalation: Category 4 (H332)
 Skin irritation: Category 2 (H315)
 Eye damage: Category 1 (H318)
 Sensitisation – skin: Category 1A (H317)
 Toxic to reproduction: Category 2 (H361d)
 Hazards to the aquatic environment, acute: Category 1 (H400)
 chronic: Category 1 (H410)

Structural formula

Reportable ingredients

	Content (% w/w)	CAS no.	EC no.	Classification
Sodium alkyl naphthalenesulphonate-formaldehyde condensate	2	577773-56-9	None	Eye Irrit. 2 (H319)
Alcohols, C13-15, branched and linear, ethoxylated	1	157627-86-6	NLP no.: 500-337-8	Acute Tox. 4 (H302) Eye Dam. 1 (H318) Aquatic Chronic 3 (H412)
1,2-Benzisothiazol-3(2H)-one	0.02	2634-33-5	EINECS no.: 220-120-9	Acute Tox. 4 (H302) Skin Irrit. 2 (H315) Eye Dam. 1 (H318) Skin Sens. 1A (H317) Aquatic Acute 1 (H400)

SECTION 4: FIRST AID MEASURES

4.1. **Description of first aid measures**

Inhalation If experiencing any discomfort, immediately remove from exposure. Light cases: Keep person under surveillance. Get medical attention immediately if symptoms develop. Serious cases: Get medical attention immediately or call for an ambulance.

Material group	5810	Page 4 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

Skin contact	Clothing contaminated with material must be removed immediately and all skin washed thoroughly with water and soap. Get medical attention if irritation develops.
Eye contact	Immediately rinse eyes with much water or eyewash solution, occasionally opening eyelids, until no evidence of chemical remains. Remove contact lenses after a few minutes and rinse again. See physician if irritation persists.
Ingestion	Let the exposed person rinse mouth and let him/her drink several glasses of water or milk, but not induce vomiting. If vomiting does occur, let him/her rinse mouth and drink fluids again. Never give anything by mouth to an unconscious person. Get medical attention immediately.
4.2. Most important symptoms and effects, both acute and delayed	Irritation and allergic reactions. The symptoms of the allergic effect range from mildly itchy, papular rash to painful, weeping and blistering dermatitis.
4.3. Indication of any immediate medical attention and special treatment needed	Immediate medical attention is required in case of ingestion. It may be helpful to show this safety data sheet to physician.
Notes to physician	A specific antidote for exposure to this material is not known. Gastric lavage and/or the administration of activated charcoal can be considered.

SECTION 5: FIRE-FIGHTING MEASURES
--

5.1. Extinguishing media	Dry chemical or carbon dioxide for small fires, water spray or foam for large fires. Avoid heavy hose streams.
5.2. Special hazards arising from the substance or mixture	The essential breakdown products are volatile, toxic, irritant and inflammable compounds such as hydrogen fluoride, hydrogen chloride, nitrogen oxides, carbon monoxide, carbon dioxide, sulphur dioxide and various fluorinated and chlorinated organic compounds.
5.3. Advice for firefighters	Use water spray to keep fire-exposed containers cool. Approach fire from upwind to avoid hazardous vapours and toxic decomposition products. Fight fire from protected location or maximum possible distance. Dike area to prevent water runoff. Firemen should wear self-contained breathing apparatus and protective clothing.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures	It is recommended to have a predetermined plan for the handling of spills. Empty, sealable vessels for the collection of spills should be available
---	---

Material group	5810	Page 5 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

In case of large spill (involving 10 tonnes of the product or more):
 1. use personal protection equipment; see section 8
 2. call emergency telephone no.; see section 1
 3. alert authorities.

Observe all safety precautions when cleaning up spills. Use personal protection equipment. Depending on the magnitude of the spill this may mean wearing respirator, face mask or eye protection, chemical resistant clothing, gloves and rubber boots.

Stop the source of the spill immediately if safe to do so. Keep unprotected persons away from the spill area. Avoid and reduce vapour or mist formation as much as possible. Personal contact with the product must be avoided.

6.2. Environmental precautions

Contain the spill to prevent any further contamination of surface, soil or water. Wash waters must be prevented from entering surface water drains. Uncontrolled discharge into water courses must be alerted to the appropriate regulatory body.

6.3. Methods and materials for containment and cleaning up

It is recommended to consider possibilities to prevent damaging effects of spills, such as bunding or capping. See GHS (Annex 4, Section 6).

If appropriate, surface water drains should be covered. Minor spills on the floor or other impervious surface should be absorbed onto an absorptive material such as universal binder, Fuller's earth or other absorbent clays. Collect the contaminated absorbent in suitable containers. Clean area with much water and detergent. Absorb wash liquid onto absorbent and transfer to suitable containers. The used containers should be properly closed and labelled.

Large spills which soak into the ground should be dug up and transferred to suitable containers.

Spills in water should be contained as much as possible by isolation of the contaminated water. The contaminated water must be collected and removed for treatment or disposal.

6.4. Reference to other sections

See subsection 8.2. for personal protection.
 See section 13 for disposal.

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

Pregnant women should not work with this product.

In an industrial environment it is important to avoid all personal contact with the product, if possible by using closed systems with remote system control. The material should be handled by mechanical means as much as possible. Adequate ventilation or local exhaust

Material group	5810	Page 6 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

ventilation is required. The exhaust gases should be filtered or treated otherwise. For personal protection in this situation, see section 8.

For its use as a pesticide, first look for precautions and personal protection measures on the officially approved label on the packaging or for other official guidance or policy in force. If these are lacking, see section 8.

Keep all unprotected persons and children away from working area.

Remove contaminated clothing immediately. Wash thoroughly after handling. Before removing gloves, wash them with water and soap. After work, take off all work clothes and footwear. Take a shower, using water and soap. Wear only clean clothes when leaving job. Wash protective clothing and protective equipment with water and soap after each use.

Do not discharge to the environment. Do not contaminate water when disposing of equipment wash waters. Collect all waste material and remains from cleaning equipment, etc., and dispose of as hazardous waste. See section 13 for disposal.

7.2. Conditions for safe storage, including any incompatibilities

The product is stable under normal conditions of warehouse storage. Protect from strong sunlight and heat. Recommended storage temperature 5 - 30°C.

Store in tightly closed, labelled containers. The storage room should be constructed of incombustible material, closed, dry, ventilated and with impermeable floor, without access of unauthorised persons or children. A warning sign reading "POISON" is recommended. The room should only be used for storage of chemicals. Food, drink, feed and seed should not be present. A hand wash station should be available.

7.3. Specific end use(s)

The product is a registered pesticide which may only be used for the applications it is registered for, in accordance with a label approved by the regulatory authorities.

♣ SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Control parameters

Personal exposure limits

To our knowledge, personal exposure limits have not been established for fluazinam or any other ingredient in this product. An 8-hr TWA exposure limit of 0.7 mg/m³ is recommended by the manufacturer for fluazinam. However, other personal exposure limits defined by local regulations may exist and must be observed.

Material group	5810	Page 7 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

Fluazinam

DNEL Not established
 EFSA has established an AOEL of 0.004 mg/kg bw/day

PNEC, aquatic 0.53 µg/l

8.2. **Exposure controls** When used in a closed system, personal protection equipment will not be required. The following is meant for other situations, when the use of a closed system is not possible, or when it is necessary to open the system. Consider the need to render equipment or piping systems non-hazardous before opening.

The precautions mentioned below are primarily meant for handling of the undiluted product and for preparing the spray solution, but can be recommended for spraying as well.

In cases of incidental high exposure, maximal personal protection may be necessary, such as respirator, face mask, chemical resistant coveralls.

If allergic reactions occur, it may be necessary to isolate the person from the product.

Respiratory protection

In the event of an accidental discharge of the material, workers must put on officially approved respiratory protection equipment with a universal filter type including particle filter.

Protective gloves

Wear chemical resistant gloves, such as barrier laminate, butyl rubber or nitrile rubber. The breakthrough time of these materials for this product are unknown. Generally, however, the use of protective gloves will give only partial protection against dermal exposure. Small tears in the gloves and cross-contamination can easily occur. It is recommended to limit the work to be done manually and to change the gloves regularly. Before removing gloves, wash them with water and soap. Be careful not to touch anything with contaminated gloves.

Eye protection

Wear face shield rather than safety glasses. It is recommended to have an emergency eye wash fountain immediately available in the work area when there is a potential for eye contact.

Other skin protection

Wear appropriate chemical resistant clothing to prevent skin contact depending on the extent of exposure. During most normal work situations where exposure to the material cannot be avoided for a limited time span, waterproof pants and apron of chemical resistant material or coveralls of polyethylene (PE) will be sufficient. Coveralls of PE must be discarded after use if contaminated. In cases of excessive or prolonged exposure, coveralls of barrier laminate may be required.

Material group	5810	Page 8 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on physical and chemical properties

Appearance	Light yellow to light red-brown liquid
Odour	Practically odourless
Odour threshold	Not determined
pH	7.5 - 8.3
Melting point/freezing point	Not determined (< 0°C)
Initial boiling point and boiling range	No boiling point. The material dries out.
Flash point	Above 103°C if any (Pensky-Martens closed cup)
Evaporation rate	Not determined
Flammability (solid/gas)	Not applicable (liquid)
Upper/lower flammability or explosive limits	Not determined
Vapour pressure	Fluazinam : 1.1 x 10 ⁻³ Pa at 20°C
Vapour density	Not determined
Relative density	1.28 at 20°C
Solubility(ies)	Solubility of fluazinam at 20°C in: acetone 1320 - 1430 g/l n-hexane 6.11 g/l water 0.042 mg/l at pH 5 0.052 mg/l at pH 7 1.33 mg/l at pH 9
Partition coefficient n-octanol/water	Fluazinam : log K _{ow} = 3.56 at 25°C
Autoignition temperature	Above 400°C if any
Decomposition temperature	Not determined
Viscosity	1400 - 1800 mPa.s, depending on shear rate
Explosive properties	Not explosive
Oxidising properties	Not oxidising

9.2. Other information

Miscibility	The product is miscible with water.
-------------------	-------------------------------------

SECTION 10: STABILITY AND REACTIVITY

10.1. Reactivity	To our knowledge, the product has no special reactivities.
10.2. Chemical stability	The product is stable during normal handling and storage at ambient temperatures.
10.3. Possibility of hazardous reactions	None known.
10.4. Conditions to avoid	Heating of the product will evolve harmful and irritant vapours.
10.5. Incompatible materials	None known.
10.6. Hazardous decomposition products	See subsection 5.2.

Material group	5810	Page 9 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

SECTION 11: TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects	* = Based on available data, the classification criteria are not met.
<u>Product</u>	
Acute toxicity	The product is not considered harmful by single exposure. * The acute toxicity of the product is measured as:
Route(s) of entry	
- ingestion	LD ₅₀ , oral, rat: > 2000 mg/kg (method OECD 425)
- skin	LD ₅₀ , dermal, rat: > 2000 mg/kg (method OECD 402)
- inhalation	LC ₅₀ , inhalation, rat: > 3.56 mg/l/4 h (method OECD 403)
Skin corrosion/irritation	Mildly irritating to rabbit skin (method OECD 404). *
Serious eye damage/irritation	Mildly irritating to rabbit eyes (method OECD 405). *
Respiratory or skin sensitisation ...	The product is an allergic sensitizer (method OECD 429).
Germ cell mutagenicity	The product contains no ingredients known to be mutagenic. *
Carcinogenicity	The product contains no ingredients known to be carcinogenic. *
Reproductive toxicity	In teratology studies on fluazinam in rats and rabbits (method US-EPA 83-3), increased incidences of fetal abnormalities were observed, such as a.o. placental abnormalities, fused or incompletely ossified sternbrae, abnormalities of the head bones, not developed renal papillae and distended ureter(s).
STOT single exposure	No specific effects other than already mentioned are expected following single exposure. *
STOT repeated exposure	The following has been measured on the active ingredient fluazinam: Target organ: liver LOAEL: 500 ppm (41 mg/kg bw/day) in a 90-day rat study. At this dose level decreased body weight and increased liver weight were seen. *
Aspiration hazard	The product does not present an aspiration pneumonia hazard. *
Symptoms and effects, acute and delayed	Irritation and allergic reactions. The symptoms of the allergic effect range from mildly itchy, papular rash to painful, weeping and blistering dermatitis. In animal tests, the main symptoms after oral intake were disturbance of respiration and decreased activity.
<u>Fluazinam</u>	
Toxicokinetics, metabolism and distribution	Fluazinam is only partially absorbed after oral intake and excreted within a few days. It is partially metabolised. Bioaccumulation is not likely. Fluazinam and its metabolites are found mainly in the blood.
Acute toxicity	Fluazinam is harmful by inhalation. The acute toxicity is measured as:

Material group	5810	Page 10 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

Route(s) of entry - ingestion LD₅₀, oral, rat: > 4100 mg/kg (method OECD 425) *
 - skin LD₅₀, dermal, rat: > 2000 mg/kg (method OECD 402) *
 - inhalation LC₅₀, inhalation, rat (male): 1.68 mg/l/4 h (method OECD 403)

Skin corrosion/irritation Mild irritating to rabbit skin (method OECD 404). *

Serious eye damage/irritation Moderately irritating to eyes (method OECD 405).

Respiratory or skin sensitisation ... Sensitising (method OECD 429).

Sodium alkylphthalenesulphonate-formaldehyde condensate

Acute toxicity The substance is not considered harmful by single exposure. *

Route(s) of entry - ingestion LD₅₀, oral, rat: > 5000 mg/kg
 - skin LD₅₀, dermal: no data available
 - inhalation LC₅₀, inhalation: no data available

Skin corrosion/irritation May be mildly irritating to skin. *

Serious eye damage/irritation Irritating to eyes.

STOT – single exposure Inhalation of dust can cause irritation of airways. According to information from supplier the product is not classified.

Alcohols, C13-15, branched and linear, ethoxylated

Toxicokinetics, metabolism and distribution After oral intake, alcohol ethoxylate is rapidly absorbed. It is partially metabolised and rapidly excreted, within a few days.

Acute toxicity The product is not considered as harmful by inhalation, ingestion or skin contact. * The acute toxicity is measured as:

Route(s) of entry - ingestion LD₅₀, oral, rat: > 2000 mg/kg
 - skin LD₅₀, dermal, rat: not available
 - inhalation LC₅₀, inhalation, rat: not available

Skin corrosion/irritation The product is irritating to skin (method OECD 404).

Serious eye damage/irritation The product is irritating to eyes (method OECD 405).

1,2-Benzisothiazol-3(2H)-one

Acute toxicity The substance is harmful by ingestion.

Route(s) of entry - ingestion LD₅₀, oral, rat (male): 670 mg/kg
 LD₅₀, oral, rat (female): 784 mg/kg
 (method OPPTS 870.1100; measured on 73% solution)
 - skin LD₅₀, dermal, rat: > 2000 mg/kg *
 (method OPPTS 870.1200 measured on 73% solution)

Material group	5810	Page 11 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

- inhalation	LC ₅₀ , inhalation: no data available
Skin corrosion/irritation	Slightly irritating to skin (method OPPTS 870.2500).
Serious eye damage/irritation	Severely irritating to eyes (method OPPTS 870.2400).
Respiratory or skin sensitisation ...	Moderate dermal sensitizer to guinea pigs (method OPPTS 870.2600). The substance appears to be significantly more sensitising to humans.

SECTION 12: ECOLOGICAL INFORMATION

- 12.1. **Toxicity** The product is very toxic to fish and other aquatic organisms. It is not considered as harmful to birds, insects and soil macro- and microorganisms. The ecotoxicity of the product is measured as:
- | | | |
|-----------------|--|---|
| - Fish | Rainbow trout (<i>Oncorhynchus mykiss</i>) | 96-h LC ₅₀ : 0.16 mg/l |
| - Invertebrates | Daphnids (<i>Daphnia magna</i>) | 48-h EC ₅₀ : 0.23 mg/l |
| - Algae | Green algae (<i>Desmodesmus subspicatus</i>) | 96-h I _r C ₅₀ : 0.13 mg/l |
| - Plants | Duckweed (<i>Lemna gibba</i>) | 7-day E _r C ₅₀ : 0.57 mg/l
7-day NOEC _r : 0.094 mg/l |
| - Birds | Japanese quail (<i>Coturnix coturnix japonica</i>) | LD ₅₀ : > 2000 mg/kg |
| - Earthworms | <i>Eisenia foetida</i> | 14-day LC ₅₀ : > 1000 mg/kg dry soil |
| - Bees | Honeybee (<i>Apis mellifera</i>) | 48-h LD ₅₀ , contact: > 100 µg/bee
48-h LD ₅₀ , oral: > 100 µg/bee |
- 12.2. **Persistence and degradability** **Fluazinam** is biodegradable, but it does not meet the criteria for being readily biodegradable. It undergoes degradation in the environment and in waste water treatment plants.
- Primary degradation half-lives for fluazinam vary much with circumstances, but are usually a few months in aerobic soil and water.
- The product contains minor amounts of not readily biodegradable components, which may not be degradable in waste water treatment plants.
- 12.3. **Bioaccumulative potential** See section 9 for octanol-water partition coefficient.
- Fluazinam** has a small potential to bioaccumulate, but is metabolised relatively rapidly. The bioconcentration factor is measured to 500 - 800 for whole fish (bluegill sunfish, *Lepomis macrochirus*).
- 12.4. **Mobility in soil** **Fluazinam** has low mobility in soil.
- 12.5. **Results of PBT and vPvB assessment** None of the ingredients meets the criteria for being PBT or vPvB.
- 12.6. **Other adverse effects** Other relevant hazardous effects in the environment are not known.

Material group	5810	Page 12 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

SECTION 13: DISPOSAL CONSIDERATIONS

- 13.1. **Waste treatment methods** Remaining quantities of the material and empty but unclean packaging should be regarded as hazardous waste.
- Disposal of waste and packagings must always be in accordance with all applicable local regulations.
- Disposal of product According to the Waste Framework Directive (2008/98/EC), possibilities for reuse or reprocessing should first be considered. If this is not feasible, the material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing.
- Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems.
- Disposal of packaging It is recommended to consider possible ways of disposal in the following order:
1. Reuse or recycling should first be considered. Reuse is prohibited except by the authorisation holder. If offered for recycling, containers must be emptied and triply rinsed (or equivalent). Do not discharge rinsing water to sewer systems.
 2. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials.
 3. Delivery of the packaging to a licensed service for disposal of hazardous waste.
 4. Disposal in a landfill or burning in open air should only occur as a last resort. For disposal in a landfill, containers should be emptied completely, rinsed and punctured to make them unusable for other purposes. If burned, stay out of smoke.

SECTION 14: TRANSPORT INFORMATION

ADR/RID/IMDG/IATA/ICAO classification

- 14.1. **UN number** 3082
- 14.2. **UN proper shipping name** Environmentally hazardous substance, liquid, n.o.s. (fluazinam)
- 14.3. **Transport hazard class(es)** 9
- 14.4. **Packing group** III
- 14.5. **Environmental hazards** Marine pollutant
- 14.6. **Special precautions for user** Avoid any unnecessary contact with the product. Misuse can result in damage to health. Do not discharge to the environment.

Material group	5810	Page 13 of 14
Product name	FLUAZINAM 500 g/l SC	January 2019

- 14.7. **Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code** The product is not transported in bulk by ship.

SECTION 15: REGULATORY INFORMATION

- 15.1. **Safety, health and environmental regulations/legislation specific for the substance or mixture** Seveso category (Dir. 2012/18/EU): dangerous for the environment
- The employer shall assess any risks to the safety or health and any possible effect on the pregnancies or breastfeeding of workers and decide what measures should be taken (Dir. 92/85/EEC).
- The Young Worker Directive (94/33/EC) prohibits people under the age of 18 to work with this product.
- All ingredients in the product are covered by EU chemical legislation.
- 15.2. **Chemical safety assessment** A chemical safety assessment is not required to be included for this product.

♣ SECTION 16: OTHER INFORMATION
